**BRABAZON PUMP COMPRESSOR AND VACUUM SELECTS
SINGLE SOURCE SYSTEMS SM-PLUS™ SERVICE MANAGEMENT SOFTWARE
TO IMPROVE EFFICIENCIES IN DISTRIBUTION AND SERVICE OPERATIONS**

Indianapolis, IN – December 16, 2008 – Single Source Systems, Inc. and Brabazon Pump Compressor and Vacuum are pleased to announce that Brabazon has selected Service Management-Plus (SM-Plus™) as its new enterprise service management software system. Brabazon will use SM-Plus to manage their entire service operation with service centers located in Wisconsin, Minneapolis/St. Paul, Illinois and the upper Peninsula of Michigan. SM-Plus will also help manage and drive efficiencies in their distribution operation. Brabazon distributes and services fluid energy equipment including pumps, mechanical seals, compressors, purification and vacuum technologies.

Brabazon will initially utilize SM-Plus to track inventory of pump and compressor replacement parts, schedule and dispatch field technicians to perform on-site parts installation, replacement, and repair requests as well as fulfill maintenance contract agreements. They also plan to take full advantage of the automated reporting and extensive mobile functionalities.

“Although we had a conventional distribution software application in place, we determined that 80% of our bottlenecks and inefficiencies were occurring in our service operation. The distribution software we were using worked fine for our distribution needs. It was not conducive to handling our service requirements. Hence, the search for a comprehensive business software application that could meet both our distribution and service objectives,” commented Heath Brabazon, President, Brabazon Pump Compressor and Vacuum. “SM-Plus seemed to fill the bill for us. In addition to just the general functionality of the product, we are also going to use the additional features offered with their Executive Dashboard and Mobile products. Executive Dashboard will push our critical numbers to us now; we won’t be going out to manually search for them. Mobile will offer our field technicians real-time history of service orders and on-site data input after the job has been completed. SM-Plus is very adaptable to the needs we need to fill in all aspects of our distribution and service operations.”

SM-Plus is an integrated information system that manages and maintains both company-owned and customer-owned assets. SM-Plus provides highly functional service business process support, including incident tracking, scheduling and dispatch, wireless mobile field service, work order management and service contracts. All functions seamlessly integrate to the inherent back-office financials, inventory, purchasing and management reporting functionality of SM-Plus-meeting the needs of an entire service organization.

(More)

“Once again, we are pleased to have yet another leading-edge company select and partner with Single Source and our SM-Plus product,” said Tony Petrucciani, CEO of Single Source. “Like many of our customers, Brabazon is a notable forerunner in *their* industry -- providing upscale distribution and service on capital equipment products. Brabazon seemed to immediately be interested and embrace all that SM-Plus had to offer their distribution and service operations from an increased productivity and efficiency standpoint. The additional icing on the cake was their excitement with what our Executive Dashboard and Mobile solution could offer them right up front. We are eager for them to experience the benefits they will reap with new functionality fully deployed.”
