SIEMENS TRANSPORTATION SYSTEMS BECOMES 300TH CUSTOMER TO CHOOSE SINGLE SOURCE SERVICE BUSINESS SOFTWARE

Indianapolis, IN and Chicago, IL – August 24, 2006 – Single Source Systems, Inc. and Siemens Transportation Systems, Inc. (STS), Locomotive Service Division of Chicago, Illinois announce Siemens' selection of SM-Plus™ as its new software system. Siemens will use SM-Plus to run its locomotive service operation, particularly for work order management to collect data from the field and consolidate it into the Siemens corporate back office system.

“We selected Single Source SM-Plus service business software to increase data consistency and integrity while providing significant time savings to the entire data processing effort. We plan to eliminate and consolidate multiple disparate systems into one integrated solution,” said Tony Ritter, Director of STS, Locomotive Division. “SM-Plus will help us reduce our transaction costs and speed access to accurate customer information for easier, better and faster decision making by our employees for a positive impact on customer satisfaction and overall profitability.”

SM-Plus is an integrated information system that manages and maintains both company-owned and customer-owned assets. SM-Plus provides highly functional service business process support, including call taking, scheduling and dispatch, field service, depot repair, work order management, preventive maintenance, service contracts, purchasing, inventory control, and costing. All functions seamlessly integrate to back-office financial and management reporting.

“Siemens' Locomotive Services Division proved to be a driving leader and a guarantee for reliable and state-of-the-art technology in the locomotive industry. As our 300th service software customer, we take great pride in adding the market leading company to our growing customer base,” said Tony Petrucciani, CEO of Single Source.

(More)

STS' Locomotive Services Division provides spares and service for the Siemens AC propulsion systems installed on EMD locomotives in North America. Siemens supports over 1,650 locomotives operating at all Class I railroads today. The range of support varies from straight forward supply of spare parts to a full service or contract maintenance arrangement with guaranteed performance stipulations.

About Siemens Transportation Systems, Inc.

Siemens Transportation Systems, Inc. (STS), headquartered in Sacramento, CA, is the number one supplier of light rail vehicles in North America with more than 800 light-rail vehicles ordered in the U.S. and Canada. The company is also known as one of the leading providers for rail equipment, services and systems integration for public transportation and Class 1 Railroads and has the only permanent U.S. light rail manufacturing facility on U.S. soil. STS' product portfolio includes traction electrification, propulsion systems, rail automation, rolling stock and integrated services for light rail, heavy rail, commuter rail and locomotives complemented by extensive experience in project management and forward looking service concepts for innovative, safe and reliable transportation solutions.
